Author of the master's dissertation: Lyashenko Olga Valerievna

Scientific supervisor of the master's dissertation: Candidate of economic sciences, associate professor of the Chair of the special management, economics and business law Spiridonidi T.V.

Customer organisation: “AversEngineering”, Llc. Pyatigorsk

Topicality of the research is conditioned by the value of the indicator of the organisation's financial stability in the system of the general assessment of its financial standing. It is just the financial stability in the market conditions that is the token of the survival and stability of the organisation. If the organisation is financially stable, solvent, then it has a number of advantages as compared with the participants of the economic turnover – when taking out loans, attracting investments; this indicator is the main determinant when establishing the organisation's contracted links. Then higher the organisation's stability, the more it is independent of the unexpected change of the market situation and, consequently, the lesser is the risk to find oneself on the brink of bankruptcy.

Objective of the work is the assessment of the organisation's financial stability in modern economic conditions and the development of the effective management decisions to improve the organisation's financial stability.

Tasks: to describe the methodology of the conduct of the analysis of the organisation's financial standing and their value for the assessment of the organisation's economic activity; to analyse the financial stability of “AversEngineering”, Llc; to develop the directions of the improvement of the financial stability of “AversEngineering”, Llc.

Theoretical and practical significance of the research is in the elaboration of the recommendation on the development and improvement of the theoretical and methodological principles of the analyses and assessment of the organisation's

financial stability on the requirements of the market economy. Practical significance is in the realisation of the author's recommendations in the practice of the organisation's financial and economic activity.

Results of the research: the work conducted a complex research into the financial standing of "AversEngineering", Llc., whose main factors of the financial stability were calculated and analysed. The results of the analyses will enable "AversEngineering", LLC. to use its potential more effectively.

Recommendations: the recommendations elaborated in the work can be useful for "AversEngineering", Llc., and are aimed to consolidate the organisation's financial standing. The proposed measures on the improvement of the financial stability will enable the organization to cut its production costs and, what's more, will help the organisation to increase its revenues. The introduction of the proposed measures does not require considerable financial investments on behalf of "AversEngineering", Llc.
