

Summary

Topic: PERFECTION OF THE PRACTICE OF ORGANIZING THE SYSTEM OF SOCIAL REHABILITATION OF CHILDREN WITH DISABILITIES OF HEALTH ON THE BASIS OF SOCIAL ORGANIZATIONS

Author: Salamova Elina Alanovna

Scientific adviser: Associate Professor, Candidate of historical science, Associate Professor, Department of Creative Innovation Management and Law, D.S. Chekmenev.

Client organization: Artek Federal Adolescent Center

The relevance of the topic is due to the fact that currently there is a steady trend aimed at the humanization of social relations, which determines the appropriate orientation of the social attitude towards children with disabilities. This led to the fact that the creation of optimal conditions for successful and productive social development of the child, his upbringing, training, social rehabilitation, and integration into the system of social interaction is considered by society as one of the most important social and humanitarian tasks in all countries of the world. including, of course, in Russia.

The purpose of the work is to summarize and systematize the theoretical and practical aspects of the organization of the system of social rehabilitation of children with disabilities and develop on this basis practice-oriented recommendations aimed at improving this area of social work at "Artek".

The achievement of this goal predetermined the nomination and consistent solution of the following scientific and practical **tasks**:

- to detail the system of social rehabilitation of children with disabilities;
- systematize and analyze the technology of social rehabilitation of children with disabilities;
- to summarize the international experience of the organization of rehabilitation of children with disabilities;
- identify the characteristics of children with disabilities as an object of social rehabilitation;
- to analyze the system of social rehabilitation of children with disabilities in "Artek";
- to determine the main directions of improving the practice of organizing the social rehabilitation of children with disabilities in the FSBEU "Artek".

The object of the research is the system of social work with children with disabilities.

The subject of the research is the process of organizing the social rehabilitation of children with disabilities on the basis of social organizations.

The main results of the study are expressed in the following provisions: first, the study detailed the system of social rehabilitation of children with disabilities as a special area of social work and as a social institution of complex importance;

secondly, the work systematized the technologies of social rehabilitation of children with disabilities, as well as clarified their content; thirdly, the work has summarized the international experience in organizing the rehabilitation of children with disabilities and outlined models of its best practices; fourth, the work identified and systematized features of children with disabilities as an object of social rehabilitation.

Recommendations. The analysis of the practical aspects of the organization of social rehabilitation of children with disabilities on the basis of social organizations that do not directly specialize in such work, carried out in this final qualifying work, showed that they really can improve the efficiency of social rehabilitation. At the same time, obviously, their technological capabilities in this kind of activity are objectively limited by the profile of their main activity. Thus, they realize social rehabilitation in its socio-cultural dimension.
