

## **ABSTRACT OF THE FINAL QUALIFICATION WORK**

**Subject of the final qualification work:** Linguistic features of the British newspaper discourse.

**Author of the final qualification work:** Botasheva Saida Sultanovna

**Research supervisor of the final qualification work:** Lola Aslanovna Kaufova

**Main parts:** Contents, Introduction, two Chapters, Conclusion, Bibliography

**Relevance of the subject of the research:** though there is a great deal of scientific research dedicated to discourse analysis, the problem of newspaper discourse is not investigated well enough. For this reason the investigation is focused on the study of linguistic and speech devices, used in formation and translation of modern newspaper discourse.

**Aim of the work:** Identification of the most frequently used linguistic devices in modern English newspapers.

### **Tasks:**

- 1) to identify the concept of discourse and its types;
- 2) to identify the features of newspaper discourse;
- 3) to identify stylistic features of British articles;
- 4) to identify linguistic devices which are used in the articles.

**Scientific novelty:** it's for the first time the investigation of linguistic data of British newspapers of the XXI century has been made. Taking into account the fact that at present the impact of newspaper articles on the audience is rapidly expanding worldwide one should be careful while analyzing and translating the information they contain.

**Theoretical importance of the research:** The complex study of linguistic, sociocultural and substantial aspects of the modern British press can contribute to the solving of problems of the text linguistics, sociolinguistics, and semantics.

**Practical value of the research:** the research results can be used in the preparation of special courses on stylistics, text linguistics and in teaching English.

**Results of the research:** In British newspaper discourse the most frequently used linguistic devices are metaphor, allusion, and abbreviation.

**Recommendations:** it is recommended to use graphic matter to illustrate the research results.
